

## **Training Programme on “Design of Disaster Resistant Housing & Risk Mitigation” February 24-26, 2016**

CSIR-CBRI has conducted three days training programme on ‘Design of Disaster Resistant Housing & Risk Mitigation’ held during February 24-26, 2016. This training course is aimed to enhancing knowledge and skills of the implementing agencies to incorporate disaster resistant techniques in building design and construction and to mitigate the risks in existing buildings. This programme was attended by 20 officers consisting of engineers, administrative authorities, scientists and students etc from different states of the country.
