

Laser Displacement Sensor: Qty: 16 Nos

The following item may be placed for re-tendering with the with the following specifications

Specifications:

- (i) Measuring Range: 150 mm to 250 mm
- (ii) Resolution/Repeability: 10 μm or less
- (iii) Measuring rate: 5 kHz or more
- (iv) Linearity: 0.03% of FSO or less
- (v) Light source: Laser diode
- (vi) Output signals: Analog
- (vii) Operating temperature: 0 - 40°C
- (viii) Power cable: 6 m or more
- (ix) Suitable for measurement of dynamic responses.
