Hands-on Training & Quiz Program for College Students

January 09, 2023, CSIR-CBRI, Roorkee (10:00-17:30 hrs)

CSIR-CBRI is continuously interacting with students to generate and upgrade their skillsets. This program is being organised with an aim of interacting with students of various institutes and give them a platform where they can learn & understand the different aspects of building sciences; also, this'll help in clearing out various doubts of the students. Through the interactive sessions during quiz and hands on training, an opportunity will be provided to the students where they'll be able to explore new ideas. CBRI consistently focus on generating a force of students with orientation towards science, and Research & Development, this program is just a small yet important step in this direction.

We expect a large number of participation from various technical institutes, for the benefit of their students and thus, the society.
