Institutional Visit for the Engineering Students from
Chandigarh University, Mohali
October 20, 2023

A one-day institutional exposure visit was arranged for 19 B. Tech Civil Engineering students of Chandigarh University, Mohali on October 20, 2023. The visit was aimed to provide an opportunity to the students for gaining the insight knowledge of CSIR-CBRI's expertise in the field of building construction carried out under various ongoing projects.

Er. Saksham Bhardwaj welcomed the students and the faculty members. Subsequently, he has briefly explained about the CSIR-CBRI activities with different divisional research domain. Later on, CSIR-CBRI Video on Realizing the Nation Dream was screened to the students which explain the institutional activities in detail. Following the introductory session, the students were taken to various laboratories of the institute to witness research activities carried out at laboratory level. These included the Geotechnical Engineering lab & Geo-hazard lab (GEGH), Structural Engineering lab (SE), Advance Concrete and Composites lab (ACSC) and Fire Safety Engineering lab (FSE). In each of these laboratories the concerned scientist/ technical officer has explained the R&D activities in-depth and demonstrated the latest technologies developed by the respective laboratories on building construction sector.

Lastly, the students were taken to *Construction Technology Demonstration Park*, where they had the opportunity to observe and explore various types of buildings constructed using different materials.

Interaction with Students

Visit to R&D Laboratories and Demonstration Park
