

CSIR-CBRI participation in Vibrant Uttarakhand 2024 Exhibition from 04-06 October, 2024 at Dehradun, Uttarakhand.

Vibrant Uttarakhand - The Global Business Hub 2024 took place at SGNPM Inter College Grounds, Race Course Road, Dehradun, from 4th to 6th October 2024. The event aimed to showcase Uttarakhand as a premier destination for investment and business development, with a focus on attracting investments, fostering global networking, promoting sustainable development, and supporting entrepreneurship and innovation. The event brought together industries from sectors such as tourism, manufacturing, and technology.

A key highlight of the event was the stall of the CSIR-Central Building Research Institute (CBRI), a leading institute in building research. CSIR-CBRI demonstrated its latest building technologies and construction machinery, focusing on innovations in construction efficiency, safety, and sustainability. These demonstrations garnered significant attention and offered eco-friendly solutions aligned with Uttarakhand's developmental goals.

- ***Visit of MP Trivendra Singh Rawat***

Former Chief Minister and Member of Parliament Trivendra Singh Rawat visited the CSIR-CBRI stall and praised the institute for its pioneering work. He acknowledged CBRI's contributions to advancing building technologies and promoting sustainable development, highlighting the impact of their work on Uttarakhand's infrastructure.

- ***DRDO (IRDE) Visit***

Representatives from the Defence Research and Development Organisation (DRDO), specifically from the Instruments Research & Development Establishment (IRDE), also visited the CBRI stall. They expressed keen interest in CBRI's research and innovations, particularly in the area of building surveillance systems, and discussed possibilities for joint collaboration to integrate advanced building technologies with defense systems.

- ***Student Engagement***

The CSIR-CBRI stall also attracted visits from students of Bannu School, Doon Imperial, IHM Dehradun, GIMS Dehradun, Quantum University, and other prominent educational institutions in Dehradun. The students were captivated by the diverse range of scientific models and technologies showcased by CBRI. They inquired about the institute's involvement in prestigious projects such as the Jagannath Temple and Ram Mandir construction. Their curiosity about the science behind these structures and CBRI's innovations in building research led to engaging discussions, sparking interest in the field of civil engineering and architecture.
