Structural Engineering Group

Structural and thermal performance of built-up (BU) section Cold-formed Steel (CFS) wallpanels with novel connections

Period: 2 years (April 23 - March 25)

Project Investigator: Chanchal Sonkar

Type of Project: Lab Funded

Sponsored by: Institute Funded

Cost: Rs. 5 Lakh

Objectives:

1. To develop design guidelines for CFS built-up section wall panels with novel connections
2. To develop thermally efficient built-up section CFS wall panels for different climatic regions of India
