## **Sustainable Development Goals**

| 13. Climate Action |   |
|--------------------|---|
| Sr. No.            | Technology Name   |
| 1                  | Standalone UV Air Disinfection System for Rooms and Spaces.   |
| 2                  | Innovative Cool Roof Technology.  |
| 3                  | Gypsum-Vermiculite-Fly Ash Light Weight Plaster.  |
| 4                  | High Volume Fly Ash-Gypsum Composite Plaster.   |
| 5                  | Design of High Draught Brick Kiln with zig-zag setting.   |
| 6                  | Formulations of Flooring Tiles from Fluorogypsum.   |
| 7                  | Formulation of High Strength Plaster from Fluorogypsum.   |
| 8                  | Process know how of Manufacture of Paver Block and Other Building Components i.e., Tiles/Bricks from C&D Waste.                               |
| 9                  | Calcium Waste Utilized Cement Free Wall Putty.  |
| 10                 | Concept Design of a Rotary Calcinator & Process for Manufacturing of Beta Hemihydrates Plaster (Plaster of Paris) from all Dehydrated Gypsum. |
| 11                 | Production of Internal Fuel Based Low Carbon Footprint Burnt clay Bricks with Criss-Cross Bricks Settings.                                    |
| 12                 | Design of Wet Scrubber Based Retrofit Emission Control Device (RECD) for Diegel Generator Sets  |
| 13                 | Light Weight Cellular Panels for Building Construction.   |
| 14                 | Processes know how to Provide Headed Bars as Mechanical Anchorage System in RC Beam-Column Joints.  |
| 15                 | Glass Façade Cum Canopy Cleaning Robot.   |
| 16                 | Affordable modular mobile crane multistory construction   |
| 17                 | Brick Making Machine for Production of Flyash-sand-Cement/Lime Bricks with Production capacity of 5000 bricks eight hours shift.              |

| 18 | A Boring Machine for making underground bores under trenchless             |
|----|--|
|    | technology.  |
| 19 | Novel Cost Effective Surficial Geometric Imperfection Measurement          |
|    | Device.  |
| 20 | Development of High Volume Fly Ash (40-50%) Gypsum Composite               |
|    | Plaster For Interior Application.  |
| 21 | Process Know-How for Preparation of Biomass Derived Materials.             |
| 22 | Process Know-How for The Development of CO2 Sequestered Artificial         |
|    | Autoclaved Lightweight Aggregates  |
| 23 | Partially Insulated Single Leaf Single Swing Metal Composite Fire Door for |
|    | 120 Minutes.   |
