Technical Exposure Visit of IIT Roorkee Students
9th February, 2026
Organized under the aegis of CSIR

The **CSIR–Central Building Research Institute** organized a technical exposure visit for around 20 students from the Architecture and Planning discipline of the **Indian Institute of Technology (IIT) Roorkee** on **09 February 2026**. The objective of the visit was to provide the students with hands-on exposure to the Institute’s ongoing research and development initiatives, with a particular emphasis on the **CBRI Demo Park**.

During the visit, the students were introduced to the purpose, scope, and importance of the Demo Park as a unique platform for full-scale demonstration of innovative construction technologies, sustainable building materials, and climate-responsive design solutions developed at CSIR-CBRI. Guided demonstrations showcased a range of prototypes and structural models representing different research and development programmes of the Institute, highlighting their significance in addressing real-world challenges in the built environment.

The interactive session enabled the students to link theoretical concepts with practical applications and gain valuable insights into emerging technologies aimed at enhancing resilience and sustainability in building systems. The visit also contributed to fostering academic–research collaboration and strengthening the students’ understanding of advanced engineering and architectural practices.

The technical exposure visit was coordinated by **Dr. Nagesh Babu Balam**, Senior Principal Scientist and Head of the APEE Group at CSIR-CBRI, Roorkee.
